# PRIMROSES

Alpines, says about the primrose: "The genus is one of the most precious and most popular with alpine gardeners. It increases as fast as an American town and every year brings new kinds, especially from Central Asia."

# PRIMROSE FARM NE VEN

We are the largest growers of Primroses in the United States, and are constantly adding new POULSBO, WASH. varieties to our collection.

WE DO OUR PART

### PRIMULA

Our primula are propagated by subdivision from carefully selected plants grown from seed imported from England, Scotland, Switzerland, China and Japan, and none without special merit are tolerated on our grounds.

Primroses do best in a rich loamy soil and prefer a partly shady location, especially with some protection from the afternoon sun.

They are perfectly hardy but should be protected by branches and leaves during zero weather.

Plant our exquisite primroses in your rock garden, or edge your tulip beds with them, or bunch them under your spireas or other blooming shrubs, or naturalize them, and you will be the envy of all your gardener friends and have joy and satisfaction untold.

Primroses, having a wonderfully varied coloring and type of growth, rank amongst the foremost plants for the rock garden, and by using the different varieties the blooming period is prolonged to ten months in this locality. The best known and perhaps the greatest favorite of them all is P. Acaulis or common primrose of our grandmothers' gardens which has now been hybridized into the most glorious color range running from blue through violet, magenta, red and orange to various shades of yellow, mostly self-colored.

The newer types include such interesting varieties as Littoniana, which in bud looks like a red hot poker, opening up into a lovely lavender and blooming all summer; Mooreana with its lovely round heads of Tyan purple with the fragrance of heliotrope, blooming from summer until frost; Florindae with its large umbels of citron yellow on three-foot stalks with oriental fragrance, and the lovely bog loving Juliae with its dark crisp leaves and deep rose flowers 2 in. high. This gives one little glimpse of the wonderful variety of the species, of which there are several hundred.

Our plants are all field grown and receive no protection except in extremely cold weather, consequently they are as hardy as it is possible to have any plant.

# PLANTING PRIMULAS

When you receive plants remove any wilted leaves or flowers and stand the roots in water for several hours before planting and keep well watered for several days, taking care in planting that the roots are not doubled and have the soil firmly placed around them.

# SHIPPING

We send all plants by parcel post. Retail orders from anywhere in the United States amounting to \$5.00 or more will be shipped prepaid. Retail orders from Oregon, Washington, Idaho and California amounting to \$2.00 or more will be shipped prepaid. On other orders send 10% in addition to the cost of the plants to pay postage.

In all cases a plant or plants will be sent gratis according to the importance of the order.

To retail buyers we sell one dozen plants of a kind at the price of ten.

# PRIMULA — (Vernales Section)

Primula Acaulis, having a single flower on a stem.

Blue Bird—A beautiful sapphire blue	.50
Cerise—Very free flowering and early. Beautiful for edgings	.20
Cheerful—Deep rose with large yellow eye. Very free flowering	.20
Dainty Miss—Rosy mauve. Earliest of all and very floriferous. Flowers freely. Each plant a most exquisite bouquet	.35
True English Primrose—A soft shade of yellow. Very fragrant and free blooming. One of the best for corsage work. Beautiful when combined with violets and very lovely when planted under deciduous shrubbery. Flowers 1½ in. in diameter	.25
Glen Cove—Large flowers of burnt orange on 12 in. stems	.35
Queen of Heaven-Large blue flowers on 6 to 8 in. stems	.35
White Lady—White with yellow eye. Extremely good	.25
PRIMULA POLYANTHA  Having Their Flowers in a Cluster	
Apricot	.25
Barr's Munstead Giants—A fine mixture in white, golden orange and yellow	.35
Crimson Velvet—Most glorious of all. Very large blossoms of heavy substance	.50
Bronze Queen—A beautiful strain with most attractive shades of apricot, bronze and orange	.35
Dark Red Velvet—Dark red with yellow eye	.35
Duplex or Hose-in-Hose—Very interesting and beautiful with one corolla placed inside another making it double and frilly	.50
Moonglow—Large clusters of pale yellow flowers on sturdy stems 12 in. high. Free bloomer	.35
Orange Glory—Beautiful self-colored orange. Extremely fragrant and most floriferous. One of the best. Do not miss this	.50
Polyantha Prize Strain—Without question the best polyanthus there is. Very large blossoms in all possible combinations of delicate shades	.35
DOUBLE PRIMULA	
Bridesmaid—Double white shading to pink	.35
Lilacea—Double lavender rose. Exquisite	50

AURICULATA	AE SECTION
These are the most marsh low have good drainage. They gro little leaves from which rise flow topped by a graceful umbel of a	ver stalks of from 4 to 12 ins.
Chrysopa—Flowers of a pleasing	g pale lilac shade
Involucrata—Leaves dark green a white flowers on 6 in. stalks. free flowering and absolutely	and very glossy with pure Delicately fragrant. Very
Luteola—Dense umbels of large 8 in. stems. July-Aug. An est very hardy. While yellow is the rose we have some flushed with are extremely attractive	pecially good primrose and he true color of this prim- th rose and apricot which

# CANDELABRA SECTION

The primulas of this section are extremely decorative and shows and they are hardy. The leaves are like the common primrose in shape but much larger. The flowers are carried on tall stalks on which are at intervals whorls of flowers ending in an umbel. They like a good moist loam with ample drainage and part shade. They will grow in full sun but fade quicker.

Reesiana-Deen	magenta		35
DecsianaDecp	magunta	80054	.00

Bulleyana—Very vigorous with flower stalks up to 3 ft. in height. Deep orange yellow	.35
Burmanica—A rich red purple with a yellow eye. The whorls are very numerous and closer together than in most primulas of this type. Will flourish in more sun than others of the section	.35
Helodoxa—Very vigorous and free flowering. About 2 ft. high. A rich golden yellow	.50
Japonica—Bright bronze red flowers. 15 ins.	.35
Japonica Atrosanguinea—Dark blood-crimson variety. Very showy	
Japonica Eximea—Extra fine strain brought to its present state of perfection by an amateur	.50
Japonica Salmonea—Very attractive salmon colored variety	.35
Pulverulenta—Beautiful light green crinkly foliage. We can supply in shades of flesh, pink, rose and crimson	.35
Pulverulenta Choice—This is one of the best of the section, much more attractive than the former. We can supply mixed in delicate pastel shades or in separate colors of coral red, salmon, apricot and flesh	.50
Red Hugh—The most vivid of all primulas—an intense fiery-red crimson. A most unusual shade. 18 ins	.50
CAPITATA SECTION	
Mooreana—This is the best known primrose of the section. From the attractive rosette of low lying bright green leaves the flower stalks rise to a height of 8 to 12 ins. and carry a rounded compact many flowered head of Tyrian purple flowers with a delicious heliotrope fragrance. Blooms from Sept. until frost. Does not object to a moderate amount of sun	.50
CORTUSOIDES SECTION	
As far as foliage is concerned this section is one of the medicorative for outside cultivation—it is large, crinkly and he ily veined. The flowers are very dainty and are carried vabove the plant on an 8 to 14 in. stalk. The plants of the section, while hardy, are useful for indoor cultivation. No a fair amount of shade.	av- well this
Cortusoides—Flowers clear rose	.35
Dentiflora—A sturdy plant, but color of flowers unknown	.35
Lichiangensis—Rose-magenta flowers with yellow eye and purple anthers on 8 in. stems. A limestone plant	.50
Saxatilis—Flowers more open than Cortusoides, but of the same color. April-May	.35
DENTICULATA SECTION	
Leaves are narrow toothed and crinkly and form classettes of foliage. Flowers are carried on stout stems was many flowers to a truss and form round heads with flow pointing up in which they differ from Capitata where flowers hang down.	vith vers
Cashmeriana—Bright purple flowers. April-May	.35
Alba—A very lovely plant. As these have not yet bloomed	.50

## **MUSCARIOIDES SECTION**

Meder Miles de Circi.
Littoniana—The best known and most popular of the section. The flower, carried on a 12 in. stalk when young is clothed with scarlet beads making it look like a Tritoma or Red-hot poker. From the bottom upward unfold tightly packed flowers of a deep violet. Spring and summer
SIKKIMENSIS SECTION
Have clusters of long toothed leaves and umbels of graceful drooping flowers on long stalks. They need shade, except in very moist climates, and a moist situation with good drainage
Florindae—An especially vigorous primula bearing large tassels of pendulous blossoms on 3 ft. stalks with as many as 100 individual blossoms to a plant. Color bright yellow with a spicy fragrance like clove pinks. Blooms in summer
Microdonta Violacea—Deep velvety flowers
Sikkimensis—Soft yellow flowers. One of the most grace-
ful of the section50
Waltoni—Flowers are a glossy port wine color, covered inside with white meal
VERNALES SECTION
This is the section to which the common primrose belongs and most of the various colored garden primula and polyantha
Elatior (The Oxlip)—This is a fine plant for the wild garden or the border
Juliae—Very low growing with red purple flowers having a golden eye. Likes a cool rich soil. A very attractive plant even when not in bloom
Leucophylla—Differs from the Oxlip in having white hairs on the under surface of the leaves. Flowers a good rich yellow
Officinalis (The Cowslip)—Another excellent primula for naturalizing. Very hardy
SEEDS
We have a small quantity of these seeds from 1933 collecting
Primula Candelabra, mixed, pkt
Meconopsis Baileyii (Blue Poppy), pkt
ALPINES and PLANTS for ROCK GARDENS
The alpines in this list are carefully selected to give the best results. We aim to have the RARE and UNUSUAL and will add to our list from time to time as we discover and procure plants we consider desirable.
Achillea Ageratum — Striking bright yellow corymbs.  Height 2½ ft. Fine in perennial border. Summer

heads, 8 in. May-June	.25
Achillea Ptarmica (The Pearl)—White double flowers all summer	.25
Aethionema Persicum (R)—Beautiful blue foliage on woody stems, and lovely pink flower heads. One of the best rock plants	.35
Aethionema Warley Hybrid (R)—Dwarfer than the above with more attractive foliage and somewhat darker pink flowers	.50
Alyssum Saxatile (Basket of Gold) (R)—Yellow. In clusters. 10 in. April-June. No rock garden is perfect without this glorious flower	.25
Alyssum Saxatile Citrinum (R)—Attractive lemon yellow flowers, of neater habit than Basket of Gold. Very desirable	.35
Alyssum Serpyllifolium (R)—Fine mat of light greyish green foliage with clustered heads of yellow flowers. 4 in.	.35
Androsace Laggeri (R)—Rare Alpine. Flowers deep rose. Fine rock plant with mossy foliage	.50
Androsace Lanuginosa Leichtlini (R)—Free growing. Silvery foliage with clusters of pink flowers	.35
Androsace Primuloides (R)—Tufts of needle-like bright green rosettes from which rise pink flowers with golden eye. 2 to 6 in. April-Mav	.35
Androsace Sarmentosa (R)—Downy foliage. Flowers of bright rose with white eye	.35
Androsace Sarmentosa Watkinsii (R)—Pink blooms with carmine eye	.35
Androsace Semperviviodes (R)—Small rosettes of slightly hairy leaves and rosy purple flowers	.50
Anemone Japonica (Japanese Wind Flower)—Rose, pink or white. All double. Fall Sept-Nov. Very fine	.35
Anemone Pulsatilla (Pasque Flower) (R)—Large violet or purple flowers with yellow centers 9 to 12 in. April-May	.25
Anemone Sylvestris (R)—Large white blossoms on nodding stems. 9 to 12 in. April-May	.25
Anthemis Aizoon (Achillea Ageratifolia) (R)—Masses of low silver-grey rosettes. Lots of white daisy-like flowers. Fine. 5 in. May-June	.25
Anthemis Tinctoria—Hardy perennial with fern like foliage producing bright golden-yellow daisies almost 2 ins. across. 24 ins. June-Oct. Excellent cut flower. Succeeds in poor soil	.25
Aguilegia Jucunda (R)—Large beautiful blooms of powder blue with pure white center. 12 ins	.35
Arabis Alpina Variegata (R)—Foliage edged with yellow white flowers. Fine rockery plant with long season	.30
Arabis Aubrietiodes (R)—Fine rock plant with purple-lilac flowers	.25
Arabis flore pleno (R)—One of the earliest spring flowers, producing masses of double white blossoms. An extra fine rockery plant and lasts well when cut. No garden should be without it. 6 to 8 ins. Early spring	.25
Arenaria Montana (R)—Makes a close tuft entirely covered with large white flowers early in the spring. Fine for edging. Sunny position	.25

grass-like foliage from which pink flowers appear on stiff stems. 9 in. June-July	.20
Artemisia Glacialis (R)—Beautiful mat of finely cut silvery foliage with yellow flowers	.25
Artemi ia Lactiflora—Tall border plant of graceful habit. Very fragrant. Fine for cutting	.25
Artemisia Silver King—The opening leaf buds gleam like tiny beads, the entire color effect that of bright frosted silver. Sprays may be cut for winter bouquets. 3 ft	.25
Asclepias Tuberosa—Large umbels of orange colored flowers. For hot dry places. June-Sept.	.25
Asperula Cynanchica (R)—A spreading plant with mists of tiny pink flowers. All summer	
Asperula Hexaphylla (R)—White form of above	.25
Asperula Odorata (Woodruff) (R)—Heads of snow white flowers appear above the foliage. Fragrant. Excellent for carpeting in shady places. 6 to 8 ins. May	.25
Aster Acris (Dwarf Michaelmas Daisy)—Plants about 15 in, high covered with a profusion of lilac-purple flowers. AugSept.	.25
Aster Alpinus (R)—A dwarf perennial aster with large flowers in pink and blue shades. Very fine plant for the rockery. 8 ins. May-June	.35
Beauty of Ronsdorf (Dwarf Michaelmas Daisy)—Great quantities of lilac rose flowers. 18 ins.	
Aster Pleiades (Dwarf Michaelmas Daisy) (R)—Covered with lavender flowers on 8 in. stems. AugSept	
Aster Yunnanensis—Brilliant lilac blue flowers in early summer	.30
Astilbe (Spirea)—Of very vigorous growth producing many branched feathered heads of flowers. Prefer partly shady moist location. Pink, white and amethyst. 24 to 30 ins. June-July	.50
Aubrietia (R)—One of the loveliest of creeping plants. Fine for edging or ground cover anywhere. A gem for planting in crevices and rock walls. Gives splashes of most brilliant violet, purple and rose. Mixed. May-July.	.25
Aubrietia Lavender Queen (R)—Has much larger flowers than the others and blooms a little later	.35
Bellis Perennis (Double English Daisy)—Red quilled	.10
Bocconia Cordata—Tree Celandine or Plume Poppy. Greyish foliage, handsome deep veined large leaves with quantities of creamy plume like blossoms. Effective in large masses	
Calceolaria Polyrrhiza (R)—A rare and unusual alpine. Brilliant yellow flowers on 6 in. stems. Pretty and in-	.35
Calypso Borealis—One of the rarest and most prized native orchids. Mauve pink. Dainty and very fragrant. Requires moist leaf loam. Early spring. 3 to 6 in. Three for	
Campanulas are indispensable in the rock garden as the bloom during the summer months when the flush of the regarden bloom is over.	ock
To have bloom during the summer months plant C. Carpat C. Rotundifolia, C. Pusilla and C. Pusilla alba with Go Heldreichii Superbum and Tunica Saxifraga Fl. Pl.	eum
Campanula Pusilla alba is particularly lovely in combina with Viola Bosniaca, also with Sempervivum Arachnoides.	HOII

Campanula Carpatica (R)—Erect open cup-like flowers.	
Violet blue. 10 in.	.25
Campanula Garganica (R)—Shiny foliage. Light blue star shaped flowers with white eye. 6 in.	.25
Campanula Garganica Erinus (R)—Pale blue flowers. Lovely rock plant. 5 in.	
Campanula Garganica Fenestrellata (R)—Clusters of small purple bells. 4 in.	.35
Campanula Pulla (R)—Shiny bells of russet-purple on 3 in. stems. Dense mat of fine foliage	.50
Campanula Pusilla (R)—Shiny green foliage with a mat of tiny pale blue thimble-like bells. 6 in.	.25
Campanula Pusilla Alba (R)—White form of the above	.25
Campanula Rhomboidalis Fl. Pl. (R)—Forms a wide mat with attractive double blue rosettes. 12 in.	
Campanula Rotundifolia (Blue Bells of Scotland) (R)— Flowers pale blue. Slender, graceful habit. 10 in	
Campanula Rotundifolia Mt. Olympus (R)—Similar to the above with flowers about twice the size and more open	.25
Campanula Turbinata (R)—Flowers similar to Carpatica only slightly smaller and plants lower. Very compact. 5 ins.	.35
Campanula—Perennial Border Plants.	
Campanula Persicifolia—White	.25
Campanula Persicifolia—Double white	.25
Campanula Persicifolia—Blue	.25
Campanula Persicifolia—Double blue	.25
Campanula Pyramidalis—Blue	.25

### **DELPHINIUMS**

Our Delphiniums are selected from the best seed obtainable and only the choicest have been retained. The plants which we sell are from field-grown clumps, not seedlings, and are truly gorgeous.

Delphiniums like a deep rich soil. If cut down to the ground after blooming they will flower two or three times during the season. The height is from 3 to 7 ft. and the individual blossoms are up to  $2\frac{1}{2}$  in. diam. Price 35 cts. each, \$3.50 a dozen, except where marked.

1 Bright blue with yellow bee. Single. 2 Double purple. Brown bee.	
3 Light blue touched with pink. Yellow bee. Double. 4 Extra fine lavender. Double. Light brown bee. Strostalk.	ong
5 Bright blue with lavender. Single. 6 Pale blue. Yellow bee. Single. 7 Pale lemon yellow and deep cream. Yellow bee. Doul 50c.	ble.
8 Sky blue. Single. White bee. 9 Indigo blue. White bee. Single. 10 Pale blue. Double. 11 Gentian blue touched with lavender. Dark bee. Single.	gle.
12 Lavender touched with blue. Yellow bee. Single.	
Dianthus Allwoodii alpinus (R)—A cross between Allwoodii and Alpinus. Of dwarf habit from 3 to 6 in. The formation of the flower is unique and the plants retain their beautiful glaucous foliage throughout the year. Various shades of rose and pink. A gem for the rock garden	.35
Dianthus Alpinus Carmineus (R)—Dwarf alpine. Handsome rosy-purple flowers	.25
Dianthus Deltoides (R)—Dwarf dark green foliage with bright pink flowers	.25
Dianthus Deltoides (R)—(Major Stearns variety). Dark brown foliage with brilliant crimson flowers	.25
Dianthus Neglectus (R)—Cherry red flowers in diminutive tufts. 3 ins.	
Dianthus Sternbergii (R)—Very dainty. Pale pink fringed flowers from grassy tufts	.25
Dicentra Eximia (Plumy Bleeding Heart) (R)—Finely cut foliage with racemes of rose pink flowers blooming from April to July. Needs well drained soil. Does well either in full sun or shade. 12 ins.	.30
Dicentra Formosa (R)—(The wild Bleeding Heart of Washington and Oregon.) Glaucous finely cut foliage with racemes of drooping rosy-lavender flowers. Very fine plant for shady places. Blooms all spring and summer	.30
Dicentra Spectabilis (Bleeding Heart)—Heart shaped flowers of rose crimson in long drooping racemes. May-June	.50
Douglasia Laevigata (R)—From the Olympic Mountains of Washington. Glossy dark green foliage in neat compact tufts. Bright pink flowers on 2 to 3 in. stems in early spring. Very rare	.50
Doronicum Caucasicum—Large yellow daisy-like flowers. Effective in clumps in the hardy border. Early Spring. 12 ins.	.25
Draba Aizoides (R)—Bright yellow flowers on 2 in. stems covering mounds of apparently prickly foliage. Spring	.25
Draba Olympicus (R)—Tight clumps of dull green foliage with golden yellow flowers. 2 in. May. A fine rock plant	.25
Dryas Octopetala (R)—Dwarf evergreen creeping shrub, having shiny, oak-like leaves with white anemone-like flowers, followed by beautiful silver fluffy whorls of seeds. Light soil and sunny exposure. 4 ins. Spring	.50
Echinops Ritro (Globe Thistle)—Plants with handsome, deeply cut greyish foliage and globular steel-blue thistle-like flowers all summer. Attractive when dried	.25
Erigeron Speciosus (Flea-bane)—Large rosy-mauve flowers with yellow centers. 18 ins. June-July	

with rosy-purple flowers on 4 in. stems. Requires well drained ordinary soil. May-June	.35
Euphorbia Myrsinites—Feathery blush foliage with crowded heads of yellow flowers. 8 in. May-Sept.	.25
Euphorbia Polychroma (Epithymoides)—A beautiful symmetrical plant forming a half round clump covered with yellow flowers. 12 in. May-June. Exceptionally good and decorative	.35
Funkia (Hosta, Plantain Lily)—Handsome massive foliage for the border with lavender or white lily-like flowers. Funkia Caerulea Lanceolata—Lavender flowers in summer	.35
Funkia Glauca—Foliage bluish with lovely white flowers	.35
Funkia Variegata Undulata—Beautiful green and cream wavy foilage. Flowers blue	.35
Gaillardia (Blanket Flower) Grandiflora—Daisy-like flowers with gorgeous colorings. The petals are marked with rays of brilliant crimson orange and vermilion. 24 ins. Blooms all summer	.35
Genista Saggitalis (R)—Dwarf species with stems curiously winged. Bright yellow flowers. Does well in poor soil. May-July. Creeping. 2 ins.	.50
Gentiana Angustifolia—Azure blue flowers with attractive foliage. Grow in peat moss	.75
Gentiana Furpurea (R)—Small dark green shining leaves with flowers of a rich Vandyck brown with a delicate fragrance. Grow in peat and part shade	.50
Gentiana Septemfida (R)—Dense evergreen mats of green leaves with erect heads of sapphire-blue flowers, white towards center. 9 in. July-Oct.	.50
Gentiana Sino-Ornata (R)—Semi-prostrate with grass-like foliage and large bright blue flowers. Lime hater. Easy to grow. A gem for the rockery	.50
Geum—Mrs. Bradshaw—Large double scarlet flowers on erect 15 in. stems. All summer	.35
Geum Lady Stratheden—Golden yellow counterpart of Mrs. Bradshaw	.35
Geum Heldreichii Superbum (R)—Brilliant orange. Blooms all summer. A fine rock plant. 8 ins.	.25
Helianthemum Mutabile (Sun Rose) (R)—Low growing evergreen plants forming large clumps covered all summer with little wild-rose-shaped flowers in orange, apricot, rose and yellow. Very fine. At the end of the blooming period the seed stems should be cut off to induce fresh bloom	.35
Helianthemum Double Red (R)	.35
Hellebore Niger—A beautiful and little known flower of great value, has large Anemone-like white flowers 3 ins. diam. Foliage evergreen resembling peony leaves. Blooms in Dec. and Jan. Very hardy, 15 ins. From 35 cts. to \$ Blooming size	2.50 .50
Hieracium Marmoreum (R)—Attractive plants with silvery woolly foliage and yellow daisy-like flowers. Any kind of soil. 12 ins.	.35
Heuchera Brizoides (Coral Bells)—Flesh, pink, rose and scarlet. Dainty and lovely. 18 ins. May-June ————————————————————————————————————	

Hypericum Calycinum—Dark green foliage and large golden yellow flowers from June to Aug. One of the best ground	
covers, especially under trees	.25
Hypericum Patulum Henryii—A shrub about 3 or 4 ft. having large golden-yellow flowers until frost	.50
Hypericum Polyphyllum (R)—Creeping habit. Yellow flowers. Splendid rock plant. 6 ins. June-Aug.	.35
Iberis (R)—Of shrubby growth with dark evergreen foliage. Good either in rockery or as edging to garden walks.  Iberis Correaefolia (R)—White. 6 ins. May-June	.25
Iberis Lilacina (R)—Lavender, 9 ins.	
Iberis Sempervirens (R)—White. Very hardy. 9 ins	
Incarvillea Brevipes (R)—Large gloxinia-like flowers, deep carmine and pink. 8 ins. Must be kept dry during winter. This is one of the wonders of the garden	
Inula Ensifolia (R)—Yellow daisy-like flowers 9 in. high. Will grow in poor soil. July until frost	.25
Iris Cristata (R)—Lavender blue flowers. Very dwarf. One of the best for the rockery	.25
Iris Red-seeded—Flowers inconspicuous but seed pods curve outward showing the beautiful coral-like seeds	.50
Jasione Humilis (R)—Pretty blue heads. Very free flowering	.25
Lavendula Atropurpurea Nana (Dwarf French Lavender) (R)—A very fine dwarf lavender. Good for edging. 6 to 10 ins. June-Sept.	.35
Lithospermum Prostratum (Heavenly Blue) (R)—Mat of evergreen foliage with intense blue flowers. One of the most wonderful blues in the garden. May-June	.50
Lotus Corniculatus Fl. Pl. (R)—Creeping mat of clover-like leaves with double yellow flowers. Good as a cover for dry banks, flowering all summer and autumn	
Lychnis Alpina (R)—Tight tufted foliage with heads of	.25
Lychnis Viscaria—Single rose. 12 in. May-June Lychnis Viscaria Fl. Pl.—Double rose flowers. Fine for	.35
rockery. 10 in. May-June	.35
Meconopsis Baileyii (Betonicifolia)—The glorious new sky- blue poppy from Thibet, semi-double with yellow anthers. 3 ft. Early summer	.35
Mentha Requieni (R)—One of the very best carpeters for a damp place. Shiny green leaves studded with tiny purple flowers. Deliciously fragrant. 1 in.	25
Mertensia—Pale blue flowers with sea-green foliage. 18 in	
Michaelmas Daisies (Hardy Asters)—Showy fall-blooming perennials. Valuable for cutting when other flowers are past their best. Feltham blue, Blue Climax, purple and	
For dwarf varieties, see under Asters.	.35
Myosotis Perennial Blue—Little columns of color. 7 ins. high. The flowers almost completely hide the foliage	
Myosotis Perennial Pink—Similar to above but pink Nepeta Mussini—An evergreen edging or rock plant with greyish-green foliage and myriads of small lavender flower	.25
spikes. Blooms all summer. Most satisfactory	.25
Oenothera Missouriensis (Evening Primrose)—Excellent for sunny position in rockery or border. Large yellow flowers from prostrate ascending branches. Solitary flow-	25
ers often 4 in. across	.35

plants 6 to 8 ins. high forming broad mats of bright glossy green foliage. A good ground cover in shady places	.25
Papaver Alpinum (R)—Neat tufts of finely cut foliage with flowers in various shades of white, rose, yellow and orange. Well drained soil. Blooms all summer. 6 ins	35
Parochetus Communis (Shamrock Pea) (R)—A very creeping half shrubby pea flower with three part leaves which close in the evening. Flowers of many shades of blue. Aug. Needs half sun and moist ground	.35
Penstemon Cardwellii (R)—Native of Wash. Evergreen shrub covered several times each season with bright purple flowers	.35
Penstemon Coral Gem—Long flowers of a most beautiful coral pink on 18 in. stems.	.35
Penstemon Menziesii (R)—Native evergreen creeper with very small leaves and 4-in, spikes of blue flowers. June July	.30
Penstemon Rattanii Minor (R)—Low growing creeper with lavender blue flowers	.35
Penstemon Rupicola (R)—Dwarf native evergreen with greyish foliage and bright red flowers on 3 to 4 in. stems. Good for dry rocky places	
Penstemon Shell Pink—Not quite so high as Coral Gem  Phlox Adsurgens (R)—Creeping evergreen with pink flowers. June-July	.35
Phlox Amoena (R)—Dark green foliage. Creeping. Bright rose flowers	.25
Phlox Divaricata Canadensis (R)—Heads of lovely fragrant lavender flowers on 12 in. stems. May-July	.25
Phlox Divaricata Laphami (R)—Longer flowering and stronger growing than the preceding with purplish blue flowers	.40
Phlox Subulata The Sprite (R)—The well known Moss Pink with prickly evergreen foliage and pale pink flowers. Very lovely

White Violet (R)—Lovely for rockery. Makes an over- hanging mat covered with white blossoms. Very fragrant	
Purple Violet (R)—Large and fragrant	
Violet Double Blue (R)—Fragrant	.25

We have mailed primroses in every month from March to November—all over the United States. They may be shipped when in flower and will keep on blooming in their new home without any interruption.

Plant either in Spring or Autumn when the temperature is not too great, and be sure to plant in partial shade which protects from the afternoon sun.

Have the soil deep and rich and the results will surprise you, as no plants respond more freely than primroses to good treatment.

Be sure and try Orange Glory. It is of magnificent color and blooms both in the Spring and Autumn, and is extremely fragrant.

The plants listed below are all of outstanding merit and deserve very special attention. Description and price will be found in the circular.

- (R) Aethionema Warley Hybrid
- (R) Alyssum Citrinum
- (R) Arabis Flore Pleno
- (R) Campanula Pusilla
- (R) Campanula Pusilla Alba Delphinium Double Cream
